FISCAL ANALYSIS

ASSUMPTION

Officials at the **Department of Revenue (DOR)** assume no impact to DOR but this proposal would reduce total state revenue.

Officials at the **Missouri Consolidated Health Care Plan (MCHCP)** assume the fiscal impact on MCHCP is the product of the predicted membership magnitude of Missouri Technology Corporation (MTC) and the estimated net payment per active employee per year. MCHCP assumes the health status of MTC subscribers and their number of dependents per subscriber is similar to MCHCP's existing active employee population. Net payments for active employee subscribers are approximately \$9,727 per subscriber per year based on 2011 estimates. Eventually, MTC would have retirees covered under their medical plan. Again, assuming the health status of MTC retirees and their number of dependents per subscriber is similar to MCHCP's existing retiree population; net payments for retiree subscribers are approximately \$7,776 per subscriber per year based on 2011 estimates.

Officials from the **Missouri State Employees Retirement System (MOSERS)** stated in order to participate in MOSERS, compensation must be paid by a "department" as defined in section 104.1003, RSMo (which includes an agency of the executive, legislative, or judicial branch and a body corporate or politic whose employees are eligible for MOSERS' coverage by law). The Missouri Technology Corporation is not a department under that definition and, therefore, the compensation paid to employees would not be included for retirement purposes.

Oversight assumes that if the employee of the authority are allowed to join MOSERS, the contribution costs would be borne by the authority and not the State.

Officials at the **University of Missouri** assume this bill would have a positive fiscal impact on the University, particularly in the areas of technology transfer and research and economic development, however, the amount of the impact is unknown.

Officials at the **Department of Economic Development, Department of Labor and Industrial Relations, Office of Administration, Office of the State Auditor** and the **Office of the State Treasurer** assume that there is no fiscal impact from this proposal.

Oversight assumes that no funding mechanism was outlined in the proposal for the Missouri Science and Innovation Reinvestment Fund so Oversight is showing the funding as coming from general revenue.

ASSUMPTION (continued)

Oversight assumes this proposal could have positive fiscal benefits for the state; however, Oversight considers these benefits to be indirect and have not reflected them on the fiscal note.
